

Please contact the office to arrange a free consultation. We will visit you to work out your requirements and what would be suitable, we will then send a detailed quote tailored to your needs.

We also provide Artificial Trees, Plants and Flowers. These can be suitable for cold or dark spots in which real plants would not flourish.

Please visit our website [www.bigplantshop.com](http://www.bigplantshop.com) to view our range of artificial products.

The Interior Plant People

Part of our human make up is to enjoy the look and presence of plants; they are aesthetically pleasing. Plants soften sterile interiors, they create a focal point and they can be used to divide areas or screen. They bring nature to work.

In addition to looking good, plants are often credited with reducing stress and helping aid concentration. Plants generate good working relations by demonstrating your company cares for it's staff.

Big Plant Company provides a range of real plants and trees as well as a range of planters in many styles and colours for offices based in Somerset & Devon.

Areca Palm

We install and then maintain the plants on a fortnightly basis. We water, prune and clean the plants ensuring they always look their best. We also offer pest control and remove litter, and should any plants die naturally, we replace them at no extra charge.
